

# REVIEW LII AUDIO

// BY **NELSON PASS**

OCTOBER 21

NOW, I FIND THEY ARE A VERY GOOD FIT  
FOR ME, AND I HAVE BEEN ENJOYING  
THEM AS I FINISH THE DESIGN  
OF MY LATEST LITTLE AMP

# QUITE IMPRESSED

Dear Francisco,

*I want to start by thanking you for your generosity, and to say that I appreciate your gift very much.*

*I received the Lii loudspeakers last month, and they arrive with one of the packing crates destroyed, but fortunately the speaker was OK.*

*I've been very busy with new product development plus the Burning Amp Festival and other stuff, but I finally got them hooked up in a proper system.*

*I am quite impressed. First off, they are very lively in their presentation, not to mention that they are very efficient. I can drive them to **high levels with just 1 watt**. The bass response is **very dynamic** and the articulation (being able to make out lyrics in songs) is **exceptionally good**.*

*There are a couple of criticisms, which I have addressed in my own way.*

*Also, the bass response is very strong in my room, so I stuffed the interior of the box with Dacron (like cotton) to damp it down a little bit.*

*I found that the upper mid and high frequencies were elevated by several dB, so I devised a little active filter to shelve that down a bit.*

*Now I find **they are a very good fit for me**, and I have been enjoying them as I finish the design of my latest little amp, the ACA mini, which is a tiny little 5 watt Class A piece for the DIYers. **The two go together very well.***

*Thanks again, and best regards.*

NP
